

APPENDIX A: CWPP Addendum For County Wildland Fire Interagency Groups

This template may be used by County Wildland Fire Interagency Groups in order to more clearly express their priorities for hazardous fuels treatments, firefighting assistance, or other needs related to the National Fire Plan. If your Working Group would like to provide more project detail, you may attach additional sheets to this form or create your own document.

The purpose of this list is to create better awareness of resource needs within the county and to better allocate resources between various grant and assistance programs at the state level. Even though the needs of a number of different fire departments or districts are to be listed here, **the needs of each fire department or district will be evaluated independently.** If fire entities are unable to develop a countywide priority list, they may list the priorities of each department or district separately. **This list of priorities may be changed at any time as projects are completed or as conditions warrant.**

Example: 1. Creation of a new fire district in a rural portion of the county.
 2. Equipment for fire districts #1 and #2
